

1 Take a conventional Light Dimmer Switch

2 Install of smart dimmer module

3 Now you can control the dimmer with your phone

Smart WiFi Light Dimmer Module

Get the ideal opportunity of replacing your traditional light dimmer with a much more advanced living solution by getting the very new Smart WI-FI Light Dimmer Module installed behind your home's switch board panel. This advanced piece of technology allows you to control the brightness of your home's lights with just a single click or voice using Amazon Alexa or Google Home on your smart phone. You can now give your phone the ultimate power to switch lights On/Off automatically instead of physically walking to the light switch every now and then.
